

I strongly urge the FCC to reject the attempt of the NAB to limit satellite radio's broadcasting traffic and weather reports to their subscribers. This is valuable information and could, in some circumstances, avert a tragedy or disaster. Any attempt by the NAB to limit this information to only their stations should be soundly defeated and roundly denounced. I urge the FCC to deny this attempt to stifle my reception of important information. I will be watching the actions taken by the FCC and Congress and will make every attempt to remove from office those individuals who support the NAB in this matter.
